<b>List of Figures .....</b>	<b>VI</b>
<b>List of Tables.....</b>	<b>VIII</b>
<b>List of Abbreviations .....</b>	<b>XI</b>
<b>1. Introduction.....</b>	<b>1</b>
1.1 Risk.....	3
1.1.1 Definition .....	3
1.1.2 Risk in Electricity Market .....	3
1.2 Risk Management.....	7
1.2.1 Hedging.....	8
1.2.2 Portfolio Optimization .....	17
1.2.3 Risk Assessment.....	19
1.3 Focus of This Book .....	24
1.4 Book Outline .....	26
<b>2. Risk and Utility Theory .....</b>	<b>29</b>
2.1 Introduction .....	29
2.2 Risk and Decision Rules .....	29
2.2.1 The Nature of Risk .....	29
2.2.2 Decision Rules under Risk .....	30
2.3 The Modern Theory of Utility.....	33

- 2.3.1 Axioms of the Expected Utility Theory..... 33
- 2.3.2 Utility Function..... 34
- 2.4 Stochastic Dominance Rules ..... 38
- 2.5 The Mean-Variance Criterion (MVC)..... 40
  - 2.5.1 Background of the MVC ..... 40
  - 2.5.2 Definition of the MVC ..... 41
  - 2.5.3 Applicability of the MVC ..... 41
- 2.6 Summary..... 42
- 3. Modern Portfolio Theory ..... 45**
  - 3.1 Introduction ..... 45
  - 3.2 Risk and Risk Aversion ..... 46
    - 3.2.1 Risk and Risk Premium ..... 46
    - 3.2.2 Risk Aversion and Utility Value ..... 47
    - 3.2.3 Portfolio Risk ..... 49
  - 3.3 Capital Allocation between the Risky Asset and the Risk-Free Asset ..... 50
    - 3.3.1 Portfolios of One Risky Asset and One Risk-Free Asset ..... 50
    - 3.3.2 Risk Tolerance and Asset Allocation ..... 52
  - 3.4 Optimal Risky Portfolios ..... 56
    - 3.4.1 Portfolios of Two Risky Assets ..... 57
    - 3.4.2 Efficient Frontier ..... 60
    - 3.4.3 Optimal Risky Portfolio ..... 62
  - 3.5 Summary..... 66
- 4. Energy Allocation between Spot Market and Contract Market ..... 69**

---

4.1	Introduction .....	69
4.2	A Simple Case—Energy Allocation in a Uniform Marginal Pricing Market .....	73
4.2.1	Portfolio Management .....	73
4.2.2	Allocation between Spot Market and Bilateral Contract Market.....	74
4.2.3	Example .....	76
4.2.4	Conclusion .....	84
4.3	General Case—Energy Allocation in a Zonal Pricing/LMP Electricity Market .....	84
4.3.1	Methodology to Energy Allocation .....	85
4.3.2	Implementation.....	92
4.3.3	Example .....	96
4.3.4	Conclusion .....	102
4.4	Summary.....	103
<b>5.</b>	<b>Impact of Hedging on Energy Allocation.....</b>	<b>105</b>
5.1	Introduction .....	105
5.2	Impact of Futures Contracts on Energy Allocation ....	106
5.2.1	Electricity Futures Contracts .....	106
5.2.2	Hedging with Futures Contracts .....	108
5.2.3	Optimal Energy Allocation .....	111
5.2.4	Example .....	115
5.2.5	Conclusion .....	118
5.3	Impact of Transmission Rights on Energy Allocation	118
5.3.1	Congestion Management .....	118
5.3.2	Energy Allocation Problem .....	120
5.3.3	Example and Discussion .....	128

- 5.3.4 Conclusion ..... 133
- 5.4 Summary..... 135
- 6. Impact of Fuel Market on Energy Allocation ..... 137**
  - 6.1 Introduction ..... 137
  - 6.2 Determination of the Risk-Penalty Factor ..... 138
  - 6.3 Energy Allocation with Fuel Price Risk into Consideration..... 140
    - 6.3.1 A Simple Case—Energy Allocation between Local Contracts and the Spot Market ..... 141
    - 6.3.2 General Case—Energy Allocation in a LMP Market ..... 145
  - 6.4 Example ..... 149
    - 6.4.1 Case 1: Trading Strategy of Gas-fired Plants.. 150
    - 6.4.2 Case 2: Trading Strategy of Coal-fired Plants . 153
    - 6.4.3 Comparison of trading strategies ..... 155
  - 6.5 Summary..... 157
- 7. A Framework of Risk Management for Gencos’ Trading in the Electricity Market..... 159**
  - 7.1 Introduction ..... 159
  - 7.2 Trading Environments and Risks ..... 159
  - 7.3 The Process of Risk Management..... 160
    - 7.3.1 Objectives ..... 160
    - 7.3.2 Constraints ..... 162
    - 7.3.3 Risk Control Strategy ..... 162
    - 7.3.4 Risk Assessment..... 167

7.4 Summary.....	169
<b>Appendices .....</b>	<b>171</b>
<b>References .....</b>	<b>173</b>

## List of Figures

Figure 1.1	Investment risk categories.....	4
Figure 1.2	Trading risk categories.....	5
Figure 1.3	Uncertainties and risks.....	7
Figure 1.4	Risk management techniques.....	8
Figure 3.1	The difference curve.....	48
Figure 3.2	Capital allocation line.....	51
Figure 3.3	Two indifference curves through a risky asset.....	54
Figure 3.4	A set of indifference curves.....	55
Figure 3.5	The graphical solution to the portfolio decision.....	55
Figure 3.6	Relationship between expected return and standard deviation of return for various correlation coefficients.....	59
Figure 3.7	The minimum-variance frontier of risky assets.....	61
Figure 3.8	Portfolio selection with a risk-free asset.....	64
Figure 3.9	Portfolio selection without a risk-free asset.....	65
Figure 4.1	The impacts of fuel price and bilateral contract price on the optimal-allocation-ratio.....	82
Figure 4.2	The impact of energy prices on the optimal-allocation-ratio-I.....	83
Figure 4.3	The impact of energy prices on the optimal-allocation-ratio-II.....	83
Figure 4.4	The impact of energy prices on the optimal-allocation-ratio-III.....	84
Figure 4.5	Efficient frontier and energy allocation line.....	89

---

Figure 4.6	Error of indirect method.....	96
Figure 4.7	Energy allocation of Case 1 .....	100
Figure 4.8	Comparison of energy allocation of Case 1 and Case 2.....	102
Figure 5.1	Time line of Genco's hedging strategy .....	108
Figure 5.2	Hedging effect of futures contracts.....	111
Figure 5.3	Optimal energy allocation ratios with and without futures contracts .....	112
Figure 5.4	Optimal allocation ratios with futures contracts .....	116
Figure 5.5	Impact of correlation coefficient on optimal allocation ratio.....	117
Figure 5.6	Price difference between Area 1 (PENELEC) and Area 2 (PEPCO) .....	129
Figure 5.7	Price difference between Area 1 (PENELEC) and Area 3 (PECO).....	130
Figure 6.1	Monthly spot price of electricity .....	150
Figure 6.2	Monthly spot price of natural gas .....	150
Figure 6.3	Impact of risk aversion on allocation ratios (gas prices are deterministic) .....	152
Figure 6.4	Impact of risk aversion on allocation ratios (gas prices are random) .....	153
Figure 6.5	Monthly spot price of coal.....	154
Figure 6.6	Impact of risk aversion on allocation ratios (coal prices are deterministic or random) .....	155
Figure 7.1	The process of risk management.....	161

## List of Tables

Table 2.1	Four Alternative Investments.....	31
Table 2.2	An Example of a Fair Gamble .....	36
Table 2.3	Implications of Attitude toward Risk.....	37
Table 4.1	Unit Characteristics .....	77
Table 4.2	Daily Spot Prices of California Electricity Market.....	77
Table 4.3	Optimal-allocation-ratio and Corresponding Expected Return and Profit.....	79
Table 4.4	The Impact of Risk-aversion on the Optimal-allocation-ratio .....	80
Table 4.5	The Impact of Bilateral Contracts Price on the Optimal-allocation-ratio.....	81
Table 4.6	The Impact of Fuel Price on the Optimal-allocation-ratio .....	81
Table 4.7	Daily Spot Price of PJM Market in August.....	94
Table 4.8	Trading Combinations .....	97
Table 4.9	Daily Spot Price of Area 2 (PEPCO) in August.....	98
Table 4.10	Optimal Energy Allocation Ratios for Case 1.....	99
Table 4.11	Optimal Energy Allocation Ratios for Case 2.....	101
Table 5.1	Particular Sources of Risks and Corresponding Hedging Instruments in the Electricity Market.....	106
Table 5.2	Optimal Allocation Ratios with and without Futures Contracts.....	115
Table 5.3	Impact of $\rho_{\lambda^E, f^*}$ on Optimal Allocation Ratios .....	117

Table 5.4 Trading Schedules of Case 1 with Uniform Bilateral Contract Prices ..... 131

Table 5.5 Break-even Price for Non-local Bilateral Contract ... 132

Table 5.6 Trading Schedules of Portfolio 3 with/without FTRs ..... 133

Table 6.1 Deterministic vs. Random (Gas prices) ..... 151

Table 6.2 Deterministic vs. Random (Coal prices) ..... 154

Table 6.3 Covariance among Transactions—Gas-fired plant.. 156

Table 6.4 Covariance among Transactions—Coal-fired plant. 157
